

SECURITY
is our **RESPONSIBILITY**

HARD TIMES – SIMPLE SOLUTIONS: W.I.S. NITO 360[®]

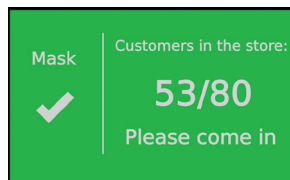

Our **NEW** product for mobile use

W.I.S. SUPPORTS YOU IN **COMPLIANCE AND DOCUMENTATION OF OFFICIAL REQUIREMENTS!**

Our mobile unit supports and minimizes staff deployment at entries and exits, using an independent AI system. In the absence of a protective face mask a warning appears (e.g. STOP!) and store manager or security will be informed. When the adjustable maximum limit of people is reached, access can be denied by displaying a waiting indication with the current numbers on the screen. Queue

recognition, distance control, use of disinfectant dispensers are optional and easy configurable. A dashboard in the store manager's office, on a smartphone or tablet PC of personnel or security and statistics for documentation complete our service package.

OUR RENTAL SOLUTION: **W.I.S. NITO 360[®]**

- ✓ Ready for use in a few minutes
- ✓ Individual advertising design
- ✓ Standard 230V socket connection
- ✓ Connection via LTE and remote services
- ✓ Easy to use
- ✓ Adaptable analytics for existing CCTV systems
